

Name(s): _____

Ecosystems of Cape Cod: Mini-Presentation

Instructions:

With your partner or group, make an illustrated poster or short presentation that describes the following:

1. What your ecosystem looks like
2. The major biotic factors (plants and animals)
3. The major abiotic factors (light, wind, water, soil, etc.)

You Should: use lots of illustrations and pictures; talk about what makes this ecosystem unique; tell us interesting, fun facts; only present for 2-3 minutes (that's why it's a mini-presentation!)

You Should NOT: use lots of words/big blocks of text; talk about things that are not important to the ecosystem; talk for more than 4 minutes

What will I be graded on?

____ /2 Neatness and Creativity

____ /3 Teamwork and Cooperativity

____ /10 Description of Biotic Factors

____ /10 Description of Abiotic Factors

____ /5 Presentation
